

Heritage School Admin Building

Office Space | 6,000 SF | Provo, UT | 2024 | Mechanical Engineer

PROJECT OVERVIEW

New building for the administration with a VRF system and ERV for exhaust and make up air

SCOPE OF SERVICES

- Load Calculations
- HVAC System Design
- Plumbing Design
- Construction Admin

KEY CHALLENGE

The client wanted no visible equipment or penetrations on the roof requiring under-eave penetrations for the ERV and make up air.

OUTCOME

Special coordination was required with the architect and the GC to ensure that the penetrations were big enough and wouldn't be noticable to passersby.
