

SIEMPRE UTAH RECEPTION CENTER

Reception Center | 10,000 SF | Draper, UT | 2020 | Mechanical Engineer

PROJECT OVERVIEW

VRF system for a 10,000 SF reception center with full service commercial kitchen located in the basement

SCOPE OF SERVICES

- Load Calculations
- HVAC System Design
- Kitchen Equipment Design
- Plumbing Design
- Construction Admin

KEY CHALLENGE

All of the mechanical equipment had to be located within a recessed rooftop well. Maintaining service and code clearances while concealing equipment proved challenging.

OUTCOME

Despite some changes to the layout during construction we were able to find code conforming locations for all of the rooftop equipment.
